**The Gate Operator Kit *Manufactured Exclusively for TS Distributors***  
**by One of the Largest Global Leaders in Gate Automation**

## **PRODUCT** ■ **FEATURES** ■

*Steel & Aluminum Drivetrain*  
*An Installer App that Speeds Up Setup*  
*...and Much More*

## WHY INSTALLERS CHOOSE RADIO GATE™

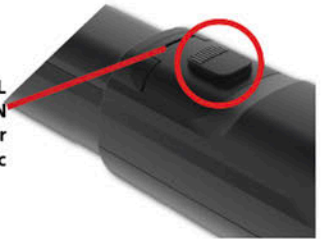

24VDC / 14 FT Gate / 661 LBS

Professional Installers Find the Control Board Interface  
Straightforward *with a Minimal Learning Curve*

- Quick Installation – *Pre-Configured wiring & simplified mounting saves time*
- Dedicated Installer App\* – *Program, adjust, and troubleshoot with real-time diagnostics using your smartphone*  
\* Requires WiFi module sold separately
- Two-Button Board Programming – *Streamlined configuration with minimal steps*
- Powered Lock Relay – *No need for external power supply*
- True Battery Backup – *Backup battery activates only during a power outage*
- Photo Eye & Built-In Receiver Included – *Ready to install right out of the box*
- Steel & Aluminum Drivetrain – *Durable and reliable for long-term usage, even in harsh environments*
- Pivoting Rear Bracket – *Able to handle slopes; engineered to operate on uphill or downhill installations*
- Easily Set Manual Limit Switches – *Simplifies and reduces adjustment time*
- Heavy-Duty Metal Construction – *Metal housing prevents cracking or breakage of components*

ALL METAL  
CONSTRUCTION  
Only a Small Cover  
on Arm is Plastic

*"Radio Gate has proven its reliability from day one—performing flawlessly through tropical storm winds, heavy rain, and freezing temps. It's a solid, dependable operator that installs with ease."*

David V., Professional  
Gate Installer, Installed  
3/22/24

## RADIO GATE™ APPS & TOOLS

### For the **INSTALLER**

**BeUP** is a **free** mobile app for professional gate installers, while **BePRO** is a web-based portal offering a more advanced, web-based portal and expands on BeUP's functions.

Both provide a suite of tools for Radio Gate installations that are able to manage, configure, and troubleshoot the gate system directly from a smart phone or tablet.

### Installer APPs that Speed Up the Setup

#### BeUP App

Mobile app (iOS or Android)  
 BeMove App Configuration  
 Instruction Manuals/Tutorials  
 Local & Remote Diagnostics & Programming  
 Local & Remote Check of Alarms & Errors  
 Local & Remote Configuration Import/Export  
 N/A  
 Add Transmitters via QR Code  
 Transmitters & Lists Management  
 Event Log  
 N/A  
 N/A

#### BePRO Portal\*

Web-based portal  
 N/A  
 N/A  
 Remote-Only Diagnostics & Programming  
 Remote Check of Alarms & Errors  
 Remote Configuration Import/Export  
 Configuration Reading & Modification  
 N/A  
 Transmitters & Lists Management  
 Event Log  
 Geolocation of Gate Install on Map  
 Document Storage

\* The remote access and advanced management features for the BePRO portal are unlocked when the w app is connected to the WiFi module GTRGWIFI2 (sold separately).

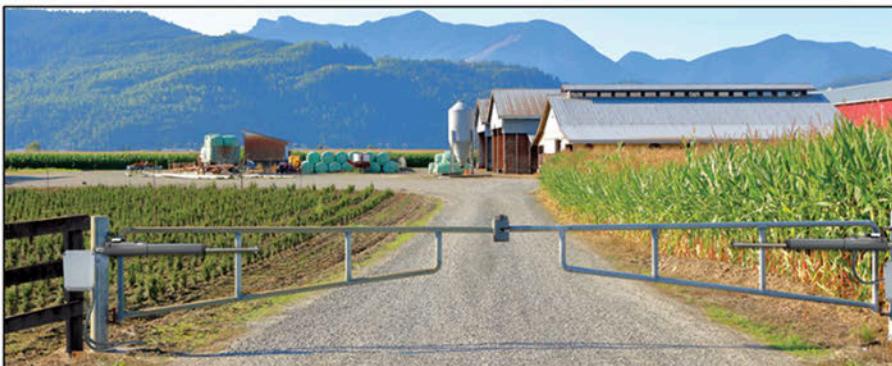

Gate operator requires WiFi module GTRGWIFI2 for any of the installer or end-user apps/portal to function.

WiFi module sold separately.

Find additional information on back page or ask your sales representative.

### For the **HOMEOWNER**

**BeMOVE** is a **free** mobile app for homeowners using a Radio Gate Swing Gate System. The app enables the user to remotely manage property automations such as gate entry/exit, control lights, blinds or irrigation systems.

### Radio Gate Kit Item # GTRGP2
